Experience

- Mar 2023 – Current Accra, Ghana

Frontend Engineer
CediRates

- April 2018 – April 2023 Accra, Ghana

Software Engineer
JubAy Avenue

As a frontend engineer at CediRates, my primary responsibility was designing the user interfaces and then translating those designs into functional code. I worked closely with my team of developers to ensure that our website was visually appealing, intuitive, and provided a seamless user experience.

As a software engineer, I applied my skills to solve problems in the education, travel, and business sectors for a tour agency. I collaborated with a diverse team, staying up-to-date with industry trends and leveraging the latest technologies to create innovative solutions that had a positive impact on our clients.
